

INSTABOOM Flagger, is a fully portable/ automated traffic control barrier, designed to control traffic and eliminate incursions within temporary works area.

This mobile flight case format, weighing under 25kg, can easily be carried and deployed by a single person. It features a detachable pole with a 2.1m red/white chevron 'board' for an instant single lane closure.

INSTABOOM Flagger is fully solar-powered, allowing a single operative to deploy an anti-incursion barrier in under a minute and operate the closure from the safety of their vehicle up to 800m away. This ensures both ease of use and enhances safety reducing the risk of accidents during deployment.

In addition to simple functionality, **INSTABOOM Flagger** also prioritizes sustainability. Running on green energy, it has a low carbon footprint and is manufactured with bamboo and biodegradable materials.

The carbon life cycle of all elements of the safety product has been considered, making it an environmentally conscious choice.

INSTABOOM Flagger
Empowering Personal Road
Safety and incursion prevention

Optional Flag Accessories

INSTABOOM Flagger is a reliable and efficient solution for controlling traffic and ensuring safety within temporary works areas. Its portability, solar-powered functionality, and sustainability features make it an innovative and responsible choice for any project.
